

## SF4301MCX New product

### classic

60cm "Classic" Compact Combination Microwave  
Oven,  
Stainless Steel & Eclipse glass

- 45cm reduced height compact oven
- 11 functions + 1 cleaning function

#### COMPACTscreen

- Other functions: defrost by time
- Other Options: Keep warm, Eco light, Quick start
- Air cooling system
- Closed door grilling
- Tilting grill
- 1 x 40W halogen light
- Triple glazed door
- Easy clean enamel interior
- Microwave output power: 1.00kW
- 3 cooking levels, metal side supports
- Rapid pre-heating
- Child safety lock

#### Vapor clean function

#### STANDARD ACCESSORIES:

- Chrome shelf
- Grill mesh
- Glass tray
- Oven capacity: gross – 50 litres, net – 40 litres
- Usable cavity space dimensions (HxWxD): 212x462x407mm

#### Nominal power: 3.10kW

- Supply can vary depending on usage, please consult a qualified electrician for ampere requirement

### Functions

## Main oven

### Upper and lower element only:

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

### Fan with upper and lower elements:

The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.

### Circulaire:

The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.

### Circulaire with upper and lower elements:

The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.

### ECO:

The combination of the grill, fan (if present) and lower element is particularly suitable for cooking small quantities of food.

### Grill element:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

### Pizza function:

The simultaneous operation of these three elements ensures an optimum cooking facility, ideal not only for pizza but also for cookies, quiches and flans.

### Microwave:

Penetrating straight into the food, microwaves cook very quickly and with considerable energy savings. Suitable for cooking without fat, they are also able to thaw and heat food without altering its original appearance and aroma. The microwave function can also be combined with conventional functions with all the resulting advantages. Ideal for all types of food.

### Upper and lower element + microwave + fan:

Fan combined with traditional cooking, where heat is generated from above and below, provides uniform heat. Adding the microwave function allows the same results in less time.

### Microwave + circulaire + fan:

Cooking with the simultaneous use of the heating element in combination with fan and microwave supply.

### Microwave + grill element:

To achieve a combined cooking with grill that cooks the outside whilst assuring an internal cooking thanks to the microwave function.
